

Ref. 2 (JP8-030497)

Numerals:

11: file name generating apparatus

12: first writing apparatus (Data is inputted as shown in an arrow from the left side.)

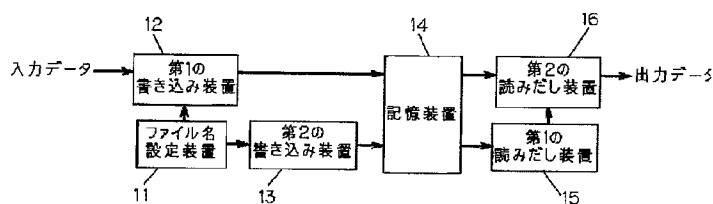

13: second writing apparatus

14: storage apparatus, and

15, 16: first and second read out apparatus

Paragraph #0014:

Referring Fig, 1, at first, a unique file name is generated in a file name generating apparatus 11. In this embodiment, since a clock is installed in the file name generating apparatus 11, the file name is constituted by a row of letters and numbers including the current time. One example is shown in Fig. 2. Specifically, the name of the file in Fig. 2, AM1108Mar31.94, denotes that the file is created in March 31, 1994 at 11:08 am. By generating such a file name, the file name is necessarily unique. If a plural of the files are created in one minute, a digit of second may be set in the file name. In this embodiment, the unique file name is generated by including the time when the file is created, however, other method may be applicable as long as the method generates unique file names.
